(54) **DATA TRANSMISSION DEVICE**

(57) Abstract

PROBLEM TO BE SOLVED: To provide with a simple constitution a data transmission device, which can be safely and surely connected to and disconnected from the buses to deal with a hot line.

SOLUTION: A terminal part block 1A can be connected to the buses L, to which the data are transmitted and also the power is supplied. The block 1A can also be connected detachably from a device main body 10 via the connectors 8a and 8b. In this case, a data signal line L1 and a power line L2 are separated from the buses L of the terminal block 1A and connected to the connectors 8a and 8b respectively.
